Weslley Teixeira

Full Stack Software Engineer | Specialized in .NET, C#, React, Angular and Node.js
Fortaleza, Ceará, Brasil

Resumo

For the past 3 years I have worked almost entirely on systems where real money moves: Internet Banking, Pix, boletos, cash-in and cash-out, core banking integration and BaaS (Banking as a Service) platforms, across Brazil and Latin America.In this domain a mistake is not a bug — it is financial loss and regulatory risk. So I build around idempotency, reconciliation, transaction traceability, reprocessing and observability, not just "the screen works".What I do:• Backend — C#, .NET, Node.js and NestJS. REST APIs, transactional services, signed webhooks, asynchronous processing and integrations with banks, acquirers and payment providers.• Frontend — React, Next.js, TypeScript, Angular, Redux and Tailwind CSS. Financial product interfaces, where performance and clarity decide whether a transaction actually gets completed.• Mobile — Flutter and Dart, including builds, release and updates on the App Store and Google Play.• Cloud — AWS with infrastructure as code in Terraform.• Application Security — authentication and authorization, RBAC, OAuth 2.0, JWT, input validation and sanitization, rate limiting, protection against injection, XSS and CSRF, Content Security Policy, secrets management, encryption and vulnerability handling following OWASP.Highlights:• Built the frontend and part of the backend of Wiiascend Internet Banking, from zero to production, also acting as Tech Lead of the team.• Took part in the full refactor of the Pix flow in FitBank's Internet Banking, improving performance, traceability and reliability of real-time transactions.• Built the iOS app in Flutter using the BLoC pattern, keeping feature parity with the web version.B.Sc. in Computer Science — Universidade Federal do Ceará (UFC), with a CNPq undergraduate research scholarship.Open to conversations about engineering in banks, fintechs and payment companies.

Experiência

PlayHub

Software Engineer

setembro de 2025 - Present (1 ano 2 meses)

Full stack engineering on streaming and entertainment products, integrating catalogs and services from Globoplay, Apple TV+, Deezer, Disney+ and Universal+.

• Develop and maintain APIs and services in C#, .NET and ASP.NET, covering business rules, third-party integrations and the evolution of systems in production.
• Build reusable interfaces and components in React and TypeScript, integrated with the product APIs.
• Work across the full cycle: requirement refinement, implementation, testing, code review, deployment and production monitoring.
• Investigate and resolve production incidents, from root cause identification to fix.

Stack: C#, .NET, ASP.NET, React, TypeScript, REST APIs, SQL

Wii Ascend Techologies

10 meses

Software Engineer | Tech Lead

agosto de 2025 - novembro de 2025 (4 meses)

Tech Lead of Wiiascend Internet Banking: a digital account with Pix, boletos, payments and account management, integrated with a banking core and BaaS (Banking as a Service) platforms. Part-time role, held in parallel with PlayHub.

• Led the development team technically: solution design, code review, development standards and hands-on technical support.
• Defined and evolved the application architecture.
• Built the Internet Banking frontend in React, TypeScript, Redux, Tailwind CSS and React Hook Form, running in production.
• Integrated the product with the banking core for Pix, boletos, payments and account management, handling idempotency, reprocessing and transaction reconciliation.
• Developed backend services in Node.js and TypeScript for the financial domain, including payment confirmation webhooks and asynchronous processing.
• Operated on AWS with infrastructure as code in Terraform.

Stack: React, TypeScript, Redux, Tailwind CSS, Node.js, Flutter, Dart, AWS, Terraform, Stripe, Fitbank, BaaS, Pix, REST APIs

Software Engineer
fevereiro de 2025 - agosto de 2025 (7 meses)

Built Wiiascend Internet Banking from the ground up — web and iOS — including integration with a banking core and Brazilian payment providers.

• Built the Internet Banking frontend in React, TypeScript, Redux, Tailwind CSS and React Hook Form, from the first commit to production.
• Developed the iOS app in Flutter and Dart using the BLoC pattern, keeping feature parity with the web version.
• Integrated BaaS (Banking as a Service) platforms for complete cash-in, cash-out and reconciliation flows.
• Implemented the banking core integration for Pix, boletos, payments and account management.
• Developed backend services in Node.js and TypeScript.
• Released and maintained the app on the App Store: builds, versioning and updates.
• Translated Figma prototypes into interface, keeping consistency between web and mobile.
• Provisioned infrastructure on AWS with Terraform.

Stack: React, TypeScript, Redux, Tailwind CSS, React Hook Form, Node.js, Flutter, Dart, iOS, AWS, Terraform, Stripe, Fitbank, BaaS, Pix, REST APIs

FitBank
Software Developer
agosto de 2024 - fevereiro de 2025 (7 meses)

Full stack development on FitBank financial products — Internet Banking, banking integrations and ERP — serving operations in Brazil and Latin America.

• Refactored, together with the team, the entire Pix flow of the Internet Banking, improving performance, traceability and reliability of real-time transactions.
• Developed and maintained APIs in C# and .NET 6 for financial operations.
• Built interfaces in React, TypeScript, Redux, Tailwind CSS, Styled Components and React Hook Form.

• Integrated banking APIs within a BaaS (Banking as a Service) ecosystem: payments, transfers, statements and reconciliation.
• Worked with regulated Brazilian payment methods, including Pix and bank transfers.
• Contributed to the Xpertia ERP, integrating financial processes and operational automation.
• Worked in Scrum with cross-functional teams, taking part in technical definitions and continuous delivery.

Stack: C#, .NET 6, React, TypeScript, Redux, Tailwind CSS, Styled Components, React Hook Form, REST APIs, BaaS, Pix, PostgreSQL, SQL Server

NewM
Software Developer
abril de 2023 - agosto de 2024 (1 ano 5 meses)

Full stack development of corporate systems, focused on the Rodobens consortium ERP.

• Developed critical features of the Rodobens consortium ERP, from analysis to production delivery.
• Built REST APIs in C#, .NET and Node.js, with layered organization and financial domain business rules.
• Developed interfaces in React.
• Optimized SQL Server queries, focused on performance and data integrity.
• Standardized environments with Docker, supporting the development and deployment pipeline.
• Maintained and evolved legacy systems in PHP and Laravel.

Stack: C#, .NET, Node.js, React, PHP, Laravel, SQL Server, Docker

CNPq
Undergraduate Research Fellow
setembro de 2021 - abril de 2023 (1 ano 8 meses)
克拉特斯, CE

CNPq undergraduate research scholarship, working as developer and researcher on physics in games and the development of educational games.

• Developed games in C++, applying physics simulation concepts.
• Modeled 3D assets in Blender and built interactive environments in Unity.

• Combined research and implementation, turning academic concepts into working software.

Stack: C++, Unity, Blender

Formação acadêmica

Universidade Federal do Ceará (UFC)

Bachelor's degree, Computer Science · (2021 - 2025)
